PROFILE

My education and experiences have strengthened my proficiency in group facilitation and holistic (governance and operational) process improvement; strategic planning and major gift fundraising; one-on-one and organizational consulting on embodying anti-oppressive practices in personal and professional settings. As an ordained minister, I bring a commitment to deep listening, compassion, and building bridges across difference. From religious ceremonies and counseling to anti-racism consulting and program development support, I hope we can find a way to collaborate and solve problems together.
